Lucas Morrone

Developer, Data Engineer , SysAdm

Problem Analysis & Resolution, Process Design, Technical Documentation, Verbal & Written Communication Staff Training & Development

Tech Skills

Python - libraries:
Pandas,Pyspark,Numpy, Seaborn, Scikitlearn.

- **Git**
- **Bash**
- **Linux / Debian**
- **Docker**
- **PowerBI**
- **SQL/NOSQL**
- **Azure Suite**
- **JS (NODE)**
- **Elixir (Phoenix)**

EDUCATION AND CERTIFICATION

- **Degree - CiberSecurity UAI | Universidad Interamericana OnCourse | finish on 2024**
- **M.Excel, PowerBi & SQLServer CoderHouse 2022**
- **JS/TS Backend CoderHouse 2022**
- **Python for**
- **DataScience, DataAnalytic,**
- **Data Engineer & ML 2022**
- **Henrys bootcamp DataScince 2023**
- **Microsoft learning plattaform Azure Suite 2023**
- **CISCO Associate 2023**
- **Elixir / SysAdm - Platzi 2023**

Self-Directed Education and Recent Experience

My interest in the field of Big Data and Business Analytics has consistently driven me to seek learning opportunities and ways to apply it in real-world use cases. My self-directed education is grounded in active exploration of online resources, including courses, conferences, specialized literature, and scholarly essays, which complement my professional experience.

Professional Experience

I have undertaken tasks where, through ETL processes, I designed easy-to-understand dashboards supported by robust data.
Furthermore, I have executed Full Stack projects that involved programming languages such as JavaScript, Python, and Elixir. My experience encompasses application development using Node.js, Webpack, Django, Flask, and Phoenix.

Specialization in Cybersecurity

I have a keen interest in the realm of cybersecurity. Presently, my focus lies in expanding my knowledge of Python within this field, with a particular emphasis on implementing pentesting techniques and advocating for ethical hacking practices.
Experience in Virtualization and Operating Systems
Furthermore, I have expertise in managing virtualized machines and handling disk partitions with multiple operating systems. My experience with Debian, especially Kali Linux, has enhanced my skills in the field of computer security, providing me with a deeper understanding of the risks and challenges inherent in project execution.

Personal Projects

- **MORROS FineArt LAB 2016/2021**
  Printer.
  Seminar presenter and professor.
  Photographer laboratory worker.
  Maintenance of web pages and social networks.
  Writing content for blogs.
  ColorManagement consultant

- **Co-founder Morrigs CryptoFarm 2018**
  Discloser
  Service Provider
  Infrastructure & maintenence

WORK EXPERIENCE

- Freelance Independent IT Problem Solver 2022 -

- Fobutec Web Development & Digital Marketing Agency 2021 - 2023
  Data Engineer
  SQL & BBDD maintenance
  Dev fullstack projects

- Zelaya producciones / Music Record 2018/2019
  Director and Editor for videomusic
  Photographer for Artist
  Retoucher and GraphicDesing Team

- El Federal / abattoir and a meat processing plant 2012/2016
  Buyer in live auction heads of bocine cattle.
  Plant salesperson for multinationals.
  Management of quality control sector.
  Data department creator
  IT Recluiter
